

Japanese Washi Paper Sample Book, Fiber Reference Guide

Greetings

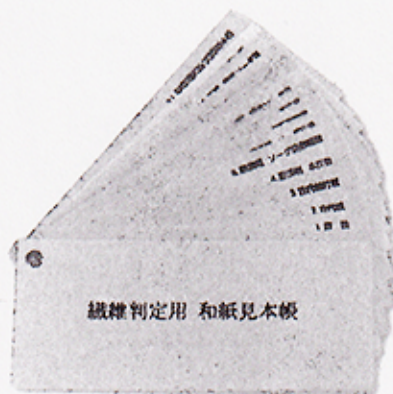

Thank you for your interest in traditional Japanese Washi Paper.

We are pleased to offer this Japanese Washi Paper Sample Book, Fiber Evaluation Guide, produced in cooperation with fiber analysis researcher, Satoshi Shishikura.

This book is unique in that a single Washi craftsman has reproduced 21 samples of Washi using various raw materials, production processes and drying techniques under similar conditions, for comparison with examples from the past. Until now, very few people could properly identify the raw materials and production processes as there was no standard for comparison. This book sets the standards for evaluating and comparing of the fibers in old documents. We hope this important resource will be used to preserve and promote Japan's paper culture and traditions.

Sincerely,

Kami no Ondo Co. Ltd.
